

# Echeveria Pearl

*Echeveria 'Perle von nurnberg'*

- My purple rosettes have made me one of the most popular succulents around! In intense sunlight, my leaves will deepen in color from a gray-purple to a bright pink-purple.
- Like my boxmate, I'm a very low-maintenance succulent to care for, and I propagate very easily.
- Keep me where I'll get partial to full sunlight and water me once a month, or whenever my soil is completely dry.
