

**FLOWER DUST PLANT**

KALANCHOE PUMILA

A dwarf succulent shrub that can grow up to 12 inches tall, and covered in soft, waxy hairs which give it its frosted look

Water moderately in the summer months, and reduce watering in winter. Be sure her pot drains well to keep away from over-moisture

Grows best in partial sun to light shade. Intense light can burn her tips

Flowers from leaves will propagate into a new plant quickly and easily

Can be harmful to pets
