👤 Profile

I'm a Bay Area software engineer focused on web apps and services. At my core, I believe passion builds great products and so I operate best on a team of spirited developers. I'm no stranger to growth and always keen to experiment. I'm at home with Python, Rails, Node and PHP stacks and am very familiar with building UIs in React and Vue.

📁 Employment History

Senior Frontend Engineer at Twitch, San Francisco

April 2018 – Present

- Developed tools in Typescript/React for ETLing and viewing large sets of data
- Experience with AWS and rigorous security practices

Software Engineer at GoDaddy, Sunnyvale, CA

July 2015 – April 2018

- Lead technical development of REST APIs in Node, Python and Rails
- Microservice work in Python and automation in Puppet
- Worked closely with UI/UX engineers to ship pixel-perfect web UIs
- Championed test-driven and agile practices, incl. leading Scrum ceremonies

Consultant Software Engineer at MetaVi Labs, Austin, TX

September 2014 – June 2015

- Deployed .NET prototypes to hardware microscopes
- Worked 1-to-1 with lab users to collect feedback

Software Developer Intern at ShoreTel, Austin, TX

June 2014 – September 2014

- Worked with Yocto, Qt, and GStreamer
- Built multimedia apps for embedded systems
- Experience setting up and troubleshooting cross-compilation toolchains for ARM chips

🎓 Education

Bachelor of Science in Computer Science, University of Texas, Austin, TX

September 2011 – May 2015

- Studies in Operating Systems, Machine Learning and Algorithms
- Earned the INFOSEC Certificate in Information Security
