## Skills

---

Javascript	Typescript	jQuery	React	Redux
Ember	Vue	Python	Sass	CSS

---

## Experience

### LinkedIn / Frontend Software Engineer

NOVEMBER 2018 - PRESENT, SUNNYVALE

Led and managed a team of 4 frontend engineers on a 6-month long project that integrated DocuSign into LinkedIn's Talent Hub product.

Worked cross-functionally with product and engineering managers, designers and backend engineers to deliver projects to spec.

### Dropbox / Frontend Software Engineer

SEPTEMBER 2017 - OCTOBER 2018, SAN FRANCISCO

Generated 2.2 million dollars in revenue within the first 4 months through optimizing user experiences with a/b testing, leveraging React, Typescript and Python.

Reduced a subsection of code base by 12% LOC by migrating Python Pyxel elements to modular React components.

Improved team culture by setting direction for team goals and objectives.

### NDA - Freelancing for Cryptocurrency Startup/ Frontend Software Engineer

JUNE 2018 - PRESENT, NEW YORK (REMOTE)

Collaborated with designer from Spotify to migrate web application that was previously built on Rails ERB to React with Redux closely following specs.

### NDA - Freelancing for Social Media Startup / Full Stack Engineer

AUGUST 2017 - PRESENT, LOS ANGELES (REMOTE)

Built web application modeling mobile app using React with Redux, Ruby on Rails, PostgreSQL and Sass.

**Client Testimonial** - "Bao has been a huge asset to our team, having now helped us on multiple web projects. He has a knack for converting our (sometimes ambiguous) project specs into beautiful designs built with solid code. He works fast, and has always been super responsive, which we really appreciate!"

### NDA - Freelancing for Mobile App Startup / Full Stack Engineer

NOVEMBER 2017 - MARCH 2018, SAN FRANCISCO (REMOTE)

Architected full stack web application utilizing Ruby on Rails with PostgreSQL on the back end and React with Redux on the front end, preprocessing CSS with Sass.

Implemented various MVPs starting from establishing flexible API endpoints, to creating aesthetic and modular React components while leveraging open-source libraries.
