

## BSA Reporting Fights Crime

by [Steve Brown](#) Topics: [BSA/AML](#), [regulatory](#), [compliance](#)

**Summary:** Enforcement agencies have successfully used BSA reporting to create financial trails that track criminals. We highlight some of their stories for you.

According to an employee study, the cost of conflict in the workplace has deeper ramifications than organizations may realize. Employees answered how they were affected after a colleague was rude or uncivil: lost work time worrying about the incident (80%); commitment to organization declined (78%); performance declined (66%); lost time avoiding offender (63%); intentionally decreased work effort (48%); intentionally decreased time at work (47%); intentionally decreased work quality (38%); left the organization (12%). Successful teamwork is clearly the way to go. We are happy to provide you with some good examples of teamwork in fighting BSA/AML crime today.

Enforcement agencies have successfully used Bank Secrecy Act (BSA) reporting to create financial trails that track criminals, their activities and their assets. At least that's the word from the Treasury and the Financial Crimes Enforcement Network (FinCEN), so we highlight some of these successful efforts:

In one investigation, sleuths based their hunt on financial data that showed one person's pattern of unusual cash withdrawals from the estate of a Toledo, OH bank customer who had recently died. To make matters more suspicious, funds from the same source were being electronically transferred into the accounts of tenants residing in a home previously owned by the deceased. This investigation turned up falsified documents designed to liquidate the departed person's accounts and give a local attorney, not the rightful heir, control of the estate (worth more than \$2mm). In the end, the true heir recovered nearly \$500,000 in cash, a motor home, three vehicles, and four pieces of real estate. The four conspirators were sentenced to prison terms and must repay the heir.

In another case, the Drug Enforcement Administration (DEA) used financial data to find and destroy two lucrative, international money-laundering rings based in southern California and Tijuana, Mexico. Both used networks of couriers, accounts, shell companies, and investments to launder drug money for traffickers connected to the Sinaloa drug cartel. The investigation yielded 27 arrest warrants and millions in cash, vehicles and real estate.

FBI agents, analysts, and accountants teamed with experts in money laundering and counterintelligence to dig into North Korean sanctions violations. A network of front companies let North Korean entities buy millions of dollars in petroleum products from a Russian company. The network then accessed the US financial system on behalf of its North Korean clients, neatly bypassing sanctions. The effort blocked transactions of nearly \$7mm and brought a penalty against two of the front companies for a total of \$20mm.

Another scheme involved a video game hack which would pay large amounts of in-game currency. This malicious code bypassed the game's security mechanisms, fooling it into believing that the user had played millions of online games in a very short period. Once the online account generated enough currency, the players moved the money to a real-world financial account. In the end, the conspirators forfeited \$10mm in fraudulently obtained funds and were found guilty.

In all of these situations, the Treasury and FinCEN say information provided by financial institutions was instrumental in helping authorities shut down criminal operations.

No matter your conflicts around BSA and other matters, it seems at least some benefit has been received, so keep your watchful eyes peeled. All in a day's work for community bankers!

## BANK NEWS

### Branches Nationwide

S&P Global Market Intelligence reports that as of the end of May there were 88,429 active bank and thrift offices nationwide. Over the past 12 months, a net 2,011 branches have been closed in the US.

### JPMorgan Accusation

An arrest warrant has been issued for JPMorgan Chase's country manager for Mexico, Eduardo Cepeda. Cepeda is accused of fraud by real estate developer BVG, which claims Cepeda never intended to sell assets that were put into a trust with the bank as guarantees for a loan.

### M&A

1) First National Bank of Pennsylvania (\$31.5B, PA) will sell its consumer finance unit to Mariner Finance for an undisclosed sum. The unit operates in 4 states and has total assets of \$170mm. 2) mBank (\$982mm, MI) will acquire Lincoln Community Bank (\$65mm, WI) for \$8.5mm in cash (100%) or about 1.23x tangible book. 3) Business First Bank (\$1.6B, LA) will acquire Richland State Bank (\$305mm, LA) for about \$50.8mm in cash (20%) and stock (80%) or about 1.48x tangible book. 4) First Midwest Bank (\$14.3B, IL) will acquire Norstates Bank (\$485mm, IL) for about \$91mm in stock (100%) or about 1.70x tangible book. 5) Minnwest Bank (\$1.7B, MN) will acquire Security State Bank of Lewiston (\$68mm, MN) for an undisclosed sum.

## ON DEMAND HELP FOR COMMUNITY BANKERS

Community bankers face many difficult challenges every year, but you are not alone. Our experts stand ready to help you address a variety of issues. Go [here](#) to view options and opportunities.
