## Information on Restriction of Hazardous Substance (RoHS) Directive

B&K Precision is committed to reducing or eliminating hazardous material from its test and measurement products, and to promote recycling or reuse.

B&K Precision's products are classified under ANNEX I, Category 9: Monitoring and control instruments including industrial monitoring and control instruments, and Article 3 (24), of Directive 2011/65/EU (recast).

This directive 2011/65/EU (recast) or RoHS 2, established by the European Union, restricts the use of six substances in electrical and electronic products.

The six substances and their maximum concentrations are:

*(Maximum concentration values tolerated by weight in homogeneous materials)*

- Lead (Pb) (0.1 %)
- Mercury (Hg) (0.1 %)
- Cadmium (Cd) (0.01 %)
- Hexavalent chromium (Cr VI) (0.1 %)
- Polybrominated biphenyls (PBB) (0.1 %)
- Polybrominated diphenyl ethers (PBDE) (0.1 %)

To this end, B&K Precision has worked diligently with its global supply partners to transition all of its products to RoHS 2 compliance. All new products are designed to also comply with the directive.
