

BARREL LOCK GUARD

Product Data Sheet

The Brooks' Barrel Lock Guard is a hardened locking device for ringless meter sockets.

FEATURES

- Constructed of yellow chromate plated hardened steel.
- Held in place by an internal angle bracket.
- An aluminum, 1/2" (12.5mm) conduit nut attached.
- Optional O-ring provides watertight integrity.
- A 7/8" (22mm) hole must be made in socket or cabinet to accept Barrel Lock Guard body.
- Mounting templates are available to help position drill holes.
- Packaging: 500 per carton.

APPLICATIONS

Brooks' Barrel Lock Guard is mounted on the cover of a ringless meter socket to protect the barrel lock from attack.
