**Risk Management – Risk Intelligence:** As pioneers of Risk Management and Risk Intelligence, this panel will explore...What is the best path forward to transform an environment that has practiced risk aversion to one that embraces risk intelligence and innovative decision-making as a cultural norm? How do we ensure the development of our workforce by igniting their disruptive potential and opportunities in real time? How do we change practices that impede our workforce from being agile and adopting inclusive human-centered design? How do we manage the complex dynamics of our mission critical program priorities in the midst of disaster or environments of constant change? How do we shift the paradigm of operational behavior to ignite and tap into peak performance that breaks down silos to unite all strata of government? How do we become courageous enough to lead through innovation and produce outcomes that bring data-driven results and break-through performance?
