

Front End Developer

Make a Real Difference - if you want your work to make a difference in the world, we are the company for you! Founded in 2010, San Diego based Source Intelligence (www.sourceintelligence.com) is a well-funded market leader that directly impacts the environment ensuring that companies supply chains are socially and environmentally responsible by meeting legal and ethical standards worldwide.

Make an Impact - We want you to go home every day with the satisfaction that what you are doing not only impacts our forward thinking company, but the environment and companies' social responsibility. We want you to be empowered and use your creativity in creating stunning UX designs and translating them into prototypes and working features. Our motto is "stimulate your mind and feed your soul". We are growing fast, and looking to expand our software engineering group with passionate and motivated people who enjoy working within a talented development team.

Responsibilities:

- Create reusable UI components
