## Chemical Safety's EMS Software Solutions

Chemical Safety Software provides industry – leading technology for chemical management and environmental compliance. Environmental Management Systems (EMS) is the most comprehensive, user friendly and functional program available for individuals that work around chemicals, as well as facility and HSE managers. Beyond premium software, we provide our clients with complete customized solutions and 24/7 support.

Chemical Safety Software is your business partner for Environmental Health and Safety (EHS) technology solutions for Facilities management, Chemical management, Waste management, and Regulatory Compliance. Chemical Safety has many successful implementations in industries such as Aerospace, High-Tech, Transportation, Life Sciences, Oil & Gas and Petrochemicals as well as R&D facilities and educational institutions.

Chemical Safety's EMS is an EHS suite of technology tools that manage chemical acquisition, storage, use and disposal seamlessly and cost-effectively.

The EMS Waste Management module works in conjunction with the EMS Chemical Inventory module to support your organization's chemical storage, use, distribution, treatment, recycling, and hazardous waste disposal.
