

Christina Meono - Software Engineer

chrismeono1022@gmail.com - chrismeono.com - github.com/chrismeono1022

Education University of California, Los Angeles – B.A. Political Science

Technical Skills Ruby, Ruby on Rails, TDD (via Rspec, Webmock, etc), Sinatra, Javascript, Coffeescript, Ember.js, CSS, HTML, Redis, MYSQL, Postgres, Apache Solr

Twenty20 - Full Stack Software Engineer

August 2014 - September 2015

Twenty20.com is a mobile photography marketplace - connecting mobile photographers with stock photo buyers.

Built API endpoints (Ruby / Sinatra / Rspec), customer-facing web app (Ember.js / Emblem.js) and internal web app (Active Admin / Rails). Other tools used include Apache Solr, Sidekiq, Stripe, MailChimp and SendWithUs.

Sole engineer responsible for building and maintaining Twenty20 subscriptions, and integrating with Stripe and Stripe webhooks. Features include sharing your subscription and purchasing credits with your teammates. A Twenty20 subscription gives you monthly credits which you can use to purchase stock photos.

Sole engineer building and maintaining sales and account management tools. Features include signing up a user, purchasing a subscription, adding a user to a subscription, adding collaborators to a photo collection, etc on user's behalf.

Lead engineer responsible for a la carte photo purchasing maintenance and development.

Built first version of photo collection collaboration tools. These tools allow any user, on a subscription, to share their photo album with their team and give the collaborators editing and purchasing rights.

Built filtering capabilities used in photo search and in photo collections. Filtering options include size, orientation, usage rights and other metadata.

Science Inc - Full Stack Software Engineer

September 2013 - July 2014

Science Inc is a media and commerce investment company. I was part of a small team of engineers, marketers and designers working on Science-backed ventures such as Ellie.com, PrizeCandle.com and CultCosmetics.com. Primarily worked with Ruby on Rails and SpreeCommerce apps.

Built custom Spree Commerce calculator to offer discounts based on SKUs.

Built jQuery plugin used by PrizeCandle.com to display prize winners and their locations.

Built URL shortener used by marketing team to direct traffic by device, campaign rules, handled dayparting, etc.

Adly Inc – Director of Media Operations

September 2010 - March 2013

Account Management team lead for social media company selling celebrity endorsements - responsible for delivering \$2 million dollars in revenue at 40%+ profitability.

Looksy.com (Adly Inc) - Customer Acquisition Lead

July 2011 - October 2012

Customer acquisition lead for Looksy.com, an ecommerce platform targeting young women; built subscriber list to 400,000+ users.
