

 SpeakerCraft®

## MT6 Series

When SpeakerCraft invented the in-wall speaker over two decades ago, we began with a six-inch woofer and a one-inch dome tweeter. This tried and true design has been evolving ever since and is now represented by the MT6 series. With four different models featuring a variety of different drivers, the MT6 will amaze you with sound quality and dependability.

Mirror image technology, where there is a dedicated speaker for left and right channels, allows for the maximum reproduction of stereo image and depth of realism. The pivoting tweeter makes it possible to direct critical high frequencies to the listening area further enhancing the listening experience. Some models also offer front-mounted EQ adjustments to fine tune the system even further. The MT6 remains a statement of quality and value.
