

Leak Sealer F4 500ml

57883

- Ideal for reducing pressure loss from sealed systems
- Seeks out and seals inaccessible, internal microscopic leaks fast
- Saves time and money on draining down and repairing
- Safe to use - does not cause blockages in pipework or vulnerable boiler components such as pumps, air vents and heat exchangers
- Left permanently in the system - compatible with all metals and materials, including aluminium
- One 1 pint recyclable bottle treats up to 34 gallons of system water (16 radiators)

Leak Sealer F4 is a internal leak sealer developed for use throughout a central heating system to seal small, inaccessible leaks and weeps which may cause pressure loss and boiler breakdown. Once dispersed within the system, the product finds the area of oxygen ingress and forms a polymer to seal the pinhole. Effective within 1-24 hours after application, the unique sealing efficiency of this market-leading water treatment chemical has been proven to prevent blockages or restrictions within the boiler or vulnerable system components such as pumps and safety devices. A leak can be quickly and efficiently sealed, without the need for a complete system drain down.

Single Item

Height mm	182
Width mm	88
Depth mm	52
Weight kg	0.600
Barcode EAN	5014551578838

Outer Carton

Outer Height mm	195
Outer Width mm	265
Outer Depth mm	180
Outer Weight kg	6.130
OCU Barcode	5.01455E+12
Transit Type	CP1 1200 x 1000
Units per carton	10
Cartons per layer	20
Total units per transit layer	200
Layers per transit type	4
Total units per transit type	800
