84000 Series - Self-Priming Centrifugal Pumps

The A.Y. McDonald 84000 Series Centrifugal Pumps is designed for both high pressure and high capacity to cover a wide range of applications. These portable units are ideal for lawn and turf sprinkling, garden irrigation, pool filling, and can be used as standby pumps for fire protection as well as other commercial uses. Individually balanced heavy-duty cast iron impellers handle silt and muddied water with a minimum of effort.

84000 Series pumps are suitable for installation where the vertical distance from the pump to the water level does not exceed 25 feet. In all installations, friction losses in the suction pipe must be taken into consideration.

This series is available in three and five horse power (HP).

The single phase motors are 230 volt only.

Three phase motors are also available for three and five horse power (HP) and require thermal overloads to be installed separately.

Complete unit includes pump, motor, and suction check valve for positive priming.

Dimensions

Model	Suction	Discharge	Inches											
			CP	D	DC	E	F	H	L	O	S	Y	Z	Z0
84300	2 NPT	2 NPT	23.25	4.50	5.00	3.75	5.00	.44	14.75	13.25	6.00	6.38	3.00	9.75
84500	2 1/2 NPT	2 NPT	23.38	4.50	5.56	3.75	2.75	.40	15.12	13.88	5.75	6.38	3.00	9.75

*84300 & 84500 Model have a "JM" face motor connection (not shown).

SUBMITTAL INFORMATION

- Residential and industrial uses
- Capacities to 170 GPM
- Heads to 171 ft. or pressure to 74 PSI
- Self-adjusting mechanical seal
- Needs no lubrication
- No foot valves or priming devices needed
- All units have built-in check valve
- Minimal operation costs

NO-LEAD: The weighted average of the wetted surface of this no-lead product contacted by consumable water contains less than one quarter of one percent (0.25%) lead.
