Walls + ceilings
Do not use on floors

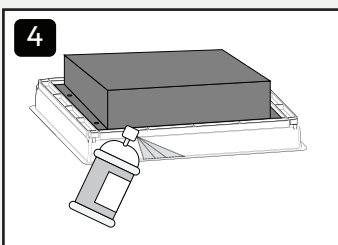

Measure fan to ensure fit.
If fan is smaller than the opening in
Framed Exhaust Mount, use
plywood as an adapter to
increase flange size.

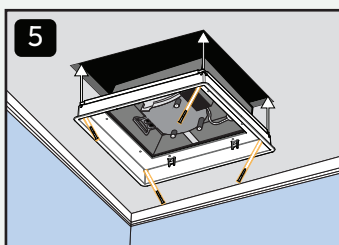

Disengage **plate**.

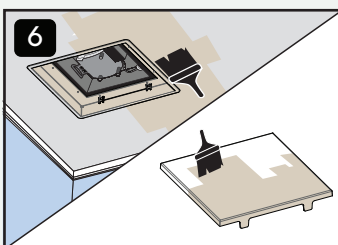

Fasten fan to **Exhaust Mount**.
Secure with screws.

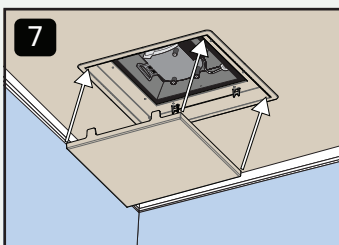

Use adhesive spray on the back of
frame to glue **Exhaust Mount** to
ceiling surface.

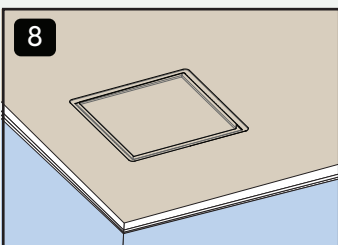

Secure inner corners to ceiling
frame using included screws.

Paint or wallpaper inside of **body + plate** to match surrounding walls.
Do not paint fan.

Align tabs on **body + plate**, push to
snap into place.

That's it! Fittes to perfection.

Walls + ceilings
Do not use on floors

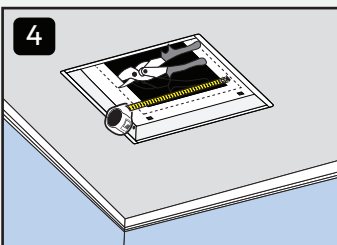

1
Dry-fit **body** into vent opening.

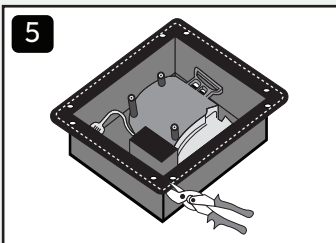

2
Ensure flange is flat to the wall.
Use screws to fasten as needed.

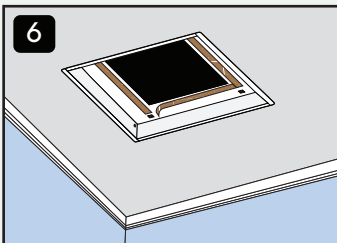

3
Measure fan to check if
adjustments need to be made to
the **Exhaust Mount** opening.

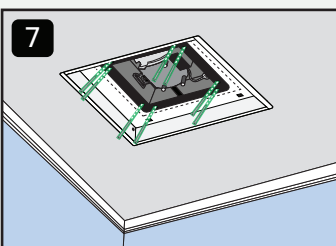

4
Measure **body**. If adjustment
is needed, cut along perforated
edges according to size in step 3.

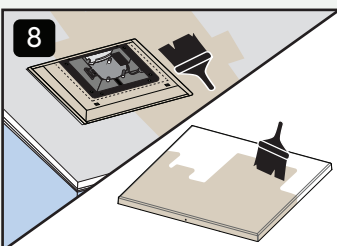

5
Some fan flanges may obstruct
holes needed to slide in the **plate**
(step 9). If this is the case, trim fan
flanges.

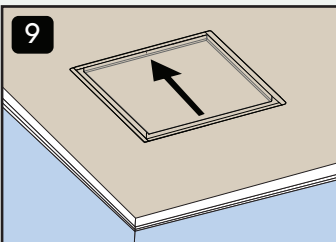

6
Stick provided **sound-dampening**
strips along the edges of the
opening.

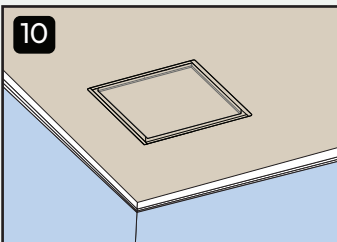

7
Mount fan, fasten with screws.
Sound-dampening strips should
be sandwiched between fan
and **body**.

8
Paint or wallpaper inside of **body** +
plate to match surrounding walls.
Do not paint fan.

9
Insert and slide **plate** into place.
Use hole on the side of the
plate as a guide.

10
That's it! Fittes to perfection.
