CU 301

The CU 301 control unit has been developed for the SQE submersible pumps.

The CU 301 enables:

- constant-pressure control on the basis of one sensor signal,
- setting of system pressure and
- monitoring of operation and alarm indication.

The CU 301 communicates with the pump via the pump cable which means that there is no need for extra cabling between the CU 301 and the pump.

Electrical data:

Main frequency: 50 Hz
Rated voltage: 1 x 100-240 V
