

DESCRIPTION

- **Independent Zone Control:**
Select any zone to run or pause watering
- **Scheduling:** Create a custom daily/weekly schedule for watering zones
- **Weather Skip:**
Automatically skips watering due to past and present precipitation
- **Autonomous Watering:**
Automatically waters your lawn based off weather and soil data
- **Dynamic Watering Adjustments:** Varying, precise irrigation by zone need
- **Seasonal Adjustments:**
Automatic adjustments depending on season
- **Watering Restrictions:**
Accommodates local/temporary watering bans based on user input
- **Valve Diagnostics:**
System tests for valve health prior to watering
- **Water Usage:**
Displays water usage in gallons so users can understand water consumption trends
- **Outdoor Usage:**
May be installed outdoors when installed in Moen Smart Sprinkler Controller Outdoor Enclosure.

OPERATION

- **Alerts:** provide notifications when watering is paused, stopped, skipped or if issues occur
Part of the Moen Smart Water Network so users can have complete control over water in and out of the home, offering compatibility with the Flo Smart Water Monitor and Shutoff
