Luxury Shower Solutions

The complete thermostatic shower system

A shower is the ultimate escape, the place where you can step away and feel rejuvenated each and every day. It's your fresh start, and we can help you make that experience a spa-like luxury, head to toe.

California Faucets is the complete shower solution with innovations at every level, including precision temperature control, state-of-the-art showerheads, handshowers, body sprays and award-winning, European-inspired luxury drains. Like every item in the California Faucets line, our shower fittings are offered in more than 30 decorative finishes, including a world-leading 12 PVD finishes, the most durable finishes available today.

And unlike most other companies, California Faucets finishes and assembles all its product in Huntington Beach, California with American labor. In this day and age? Imagine that.

The shower revolution starts here

At the heart of a California Faucets shower is StyleTherm®, a revolutionary new approach to the thermostatic shower valve.

Most standard shower systems today offer minimal, if any, safety features. By turning handles, you experiment and adjust hot and cold water until it feels right. And you start the process from scratch with every shower you take. Bump a handle or flush a toilet and you or your child could be scalded.

For years, there's been a much more advanced technology that allows you to set a predetermined temperature. These luxury "thermostatic" fittings have a temperature-sensing element that maintains a precise temperature. In addition to being a superior fitting, it's a much safer alternative, especially for children or the elderly.

The only reason you wouldn't want thermostatic technology in your shower is that it's quite a bit more expensive.

Until now.

With innovative engineering solutions developed at California Faucets, we've created StyleTherm, offering superior showering technology **at the same price** as most standard valves. As a result, you not only have access to a better shower system, you can afford to install it in every shower in your home. After all, don't you want a safer alternative in every shower, especially those used by children, the elderly or guests?

Ask your California Faucets dealer to help you compare StyleTherm to other brands and you'll immediately see why StyleTherm is a higher-quality fitting with superior components and details.

StyleTherm®

It's easy to choose your ideal shower system.

Every California Faucets StyleTherm shower fitting delivers precision temperature control for comfort and safety. And all of them are available for less than an inferior standard technology, such as pressure balance.

As a result, you can now install a safe, precision temperature control fitting in every shower in your home.

Choosing the right one comes down to the style you prefer and the number of shower applications you want to operate. For example, in your master bath, do you want to run the showerhead, a handheld spray and body spray at the same time? Or just two of those? Is it a children's or guest's shower designed with only a single showerhead or a more typical tub/shower combination?

The answer to these questions is important, because StyleTherm's innovative design features independent water volume control for all applications without the need to toggle between them. And they can be designed for virtually any desired scenario.

** StyleTherm versions available to meet even the strictest water conversion codes.*

FEATURE COMPARISON	STANDARD PRESSURE BALANCE	STYLETHERM® THERMOSTATIC
Delivers mixed water to showerhead	✓	✓
Easily and accurately sets precise mixed water temperature		✓
Protects against dangerous sudden changes in both water pressure and temperature		✓
Temperature override button prevents inadvertent scalding		✓
Volume control(s) allow you to adjust water flow from low to high		✓
Independent volume controls allows you to operate multiple devices simultaneously*		✓

StyleTherm is superior thermostatic technology AND it's available at the cost of inferior shower systems.

Why settle for less? StyleTherm is the ONLY solution.

Build your ideal customized shower

California Faucets is known for its Custom Faucetry® and our shower program is no different. That means we give you the ability to design exactly what you want with choices you can't find anywhere else. Once you've chosen from a variety of components, styles and finishes, we hand assemble your shower fittings specifically for you.

Showerheads - pp.12,13

Handshowers - pp.12,13

Body Spray - p.15

Spouts

2. Choose a StyleTherm thermostatic system. How many applications do you want to use simultaneously?

One - pp.6,8 Two - p.4 Multiple - p.10

Choose a faceplate style. Traditional Round, Contemporary Round or Square Transitional.

Choose a handle style (more than 25 available).

Choose a finish (more than 30 available).

3. Choose a drain style.

StyleDrain - p.16

CeraLine - p.17

All California Faucets shower components are available separately or as a complete, unified shower system.

StyleTherm®

1/2" Dual Integral Volume Control System

Our Dual Integral Volume Control models have a high flow rate and independent water volume controls that allow you to operate up to two shower applications simultaneously or independently with no temperature variation or loss of flow rate.

StyleTherm 1/2" - Venice 47 Series
(With dual volume controls)
TO-TH2L-47

StyleTherm 1/2" - Montara 66 Series
(With dual volume controls)
TO-TH2L-66

StyleTherm 1/2" - Avalon 62 Series
(With dual volume controls)
TO-THC2L-62

Ideal for guest bathrooms or showers used by children or the elderly where a handheld shower is desirable.

 - Slider and Handshower Kit
 - Style Therm Dual Volume Control Tiburon 65 Series TO-TH2L-65

StyleTherm®

1/2" Integrated Two-Way Diverter

With the addition of a diverter, this StyleTherm model meets stringent water conservation standards, including the most stringent of them all, the California Green Building Standards Code (CALGreen). In fact, it's the first thermostatic fitting that does.

But don't think of it as a water-conservation fitting. It's simply a StyleTherm model that accommodates two applications for those who use only one application at a time. Just toggle between applications. And while pressure balance systems only allow water flow that's all on or all off, StyleTherm gives you volume control for each device.

StyleTherm 1/2" - Venice 47 Series
(With two-way diverter)
TO-THIL-47

StyleTherm 1/2" - Montara 66 Series
(With two-way diverter)
TO-THIL-66

StyleTherm 1/2" - Avalon 62 Series
(With two-way diverter)
TO-THCIL-62

Ideal for secondary bathrooms with a compact, single-use shower or showers subject to water-conservation standards.

CalGreen

California has some of the country's most stringent water conservation standards. Now California Faucets has created the first thermostatic system that's entirely compliant with the California Green Building Standards Code (CALGreen). Our innovative design modifications meet the CALGreen code requirements while still offering the superior features and benefits of a thermostatic shower system, including volume control, anti-scald protection and precision water temperature settings.

StyleTherm®

3/4" Thermostatic System

Ideal for your luxury master bath, this model accommodates multiple shower applications simultaneously, each with its own independent volume control (see photo). You can enjoy a rain showerhead, body spray and hand-held spray all at once, two at once or just one. It offers the greatest flexibility and allows you to create an ideal, customized shower experience.

StyleDrain® The Original.

California Faucets was the first company in the United States to create and introduce luxury shower drains to the American market. Our creation, StyleDrain®, became the first decorative shower drain system of its kind.

Made of solid, forged brass, this patented design features 30 custom finishes to match any fitting. With no visible screws, it's easy on the eyes and feet. Like most superior products, cheap imitations are beginning to appear, but StyleDrain is the original and the best.

StyleDrain® Tile The best drain you'll never see.

New from the makers of award-winning StyleDrain, a drain that virtually disappears. Allowing you to lay in any tile or stone to seamlessly match the rest of the shower, StyleDrain Tile begs the question: Where'd the drain go?

To help blend visually with the rest of the shower, the brass tile frame is available in six finishes, including five superior PVD finishes, the most durable choice available today.

With a wide range of innovative design features, StyleDrain Tile is a superior shower solution, both visually and functionally. It's easier to install, compatible with all waterproofing methods, and designed for level installation with no sharp edges.

Tile 9190: Photos above are examples (tile and stone are not included).

CeraLine®

The fine line in shower drains.

Imagine a shower drain that's so sleek, clean and elegant that droplets from the shower flow sensuously until they disappear into a barely visible line in the floor. Introducing CeraLine® from the makers of StyleDrain®. CeraLine is a high capacity drain system that allows the creation of a curbless, fully accessible shower. Now available in North America, CeraLine is recognized throughout Europe for its beautiful, minimalist style. Winner of many international and American design awards, it's offered in three trim styles and six finishes.

Inexpensive, flimsy imitations are flooding the market. But CeraLine stands alone as the finest line in contemporary showers drains. In quality and design, there's only one CeraLine.

California Faucets®

Custom Faucetry®

www.californiafaucets.com

Made in California, USA

Unlike most faucet manufacturers who sell products manufactured and assembled overseas, California Faucets designs, assembles, finishes, engineers, and tests its products in California. We employ more American labor per faucet sold than nearly every other faucet manufacturer.
