

Since 1977, the Niagara name has become synonymous with innovative conservation for a growing customer base of utility companies, government leaders, energy management officials, and eco/cost-conscious homeowners and developers.

Today—as climate change, population growth, and record droughts present an unprecedented strain on our water supply—we are more obsessed than ever. Niagara is doubling down on our purpose and pushing our technology to invent new ways for our customers to conserve water without sacrificing performance.

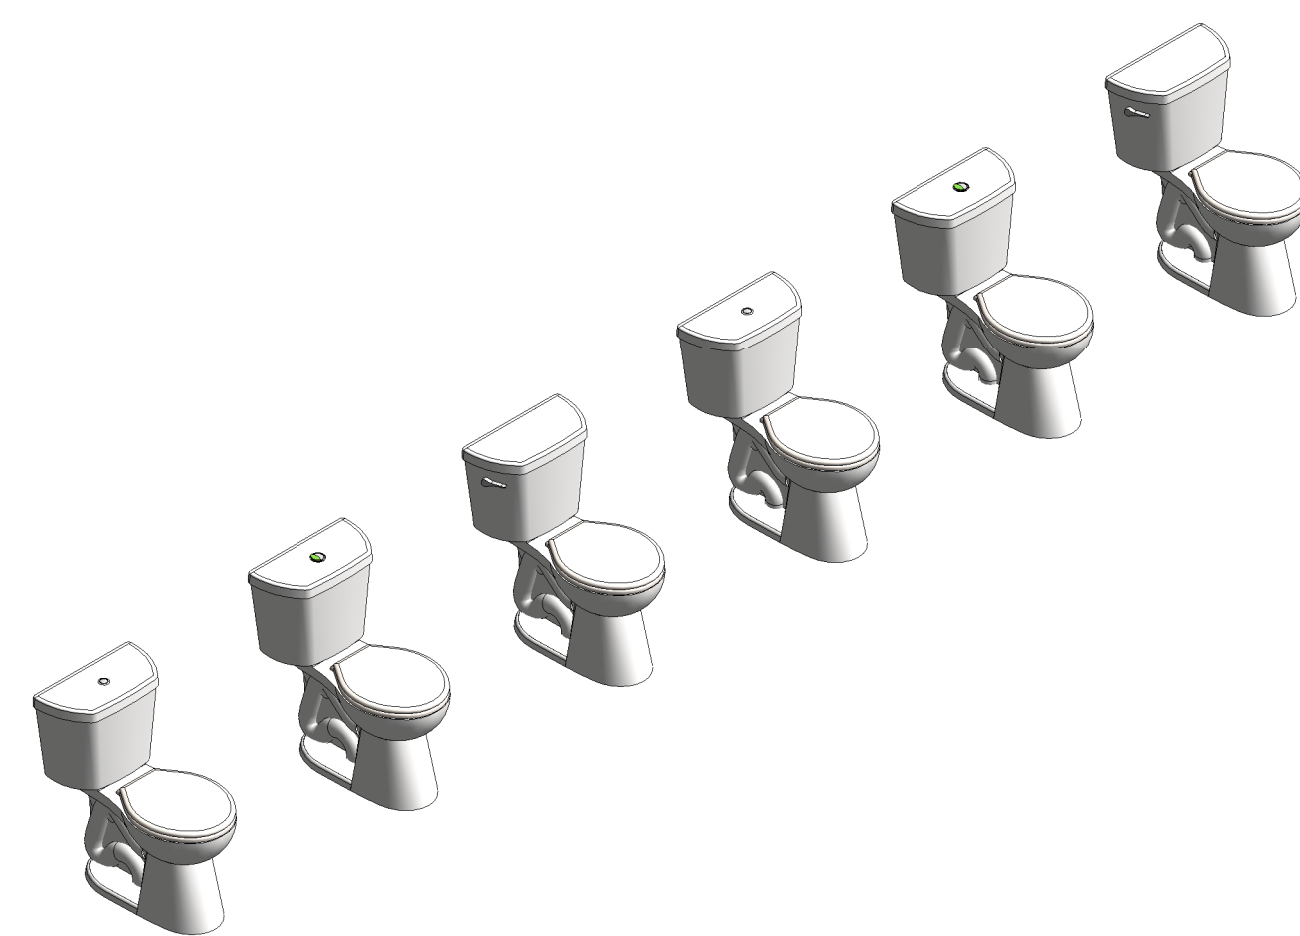

## STEALTH<sup>®</sup> TECHNOLOGY

Niagara Stealth<sup>®</sup> toilets use the least amount of water possible while delivering a powerful and quiet performance. The first and only true ultra-high-efficiency toilet on the market.

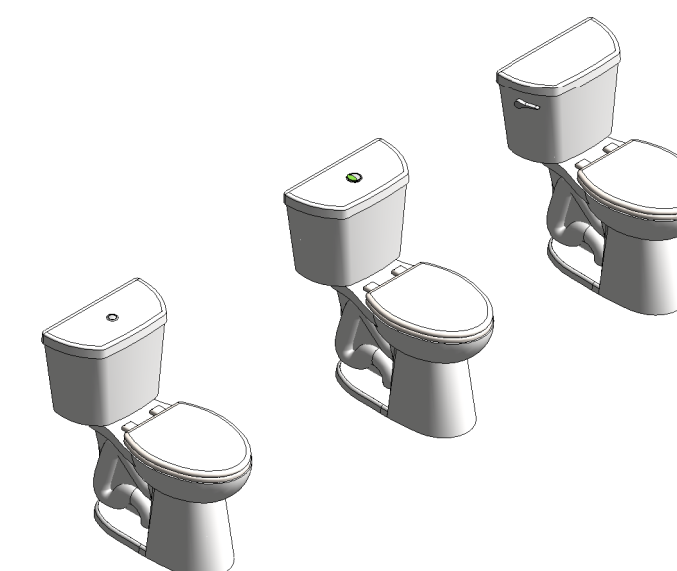

- Patented Vacuum-Assist Technology
- No Flapper. No Leaks.
- Maintenance Free - no flappers, chains and levers to replace
- No Double Flushing - one flush will thoroughly empty the bowl every time.
- Noise-Canceling Tanks
- Fully-Glazed Trapway
