

# iPERL<sup>®</sup>+: The Gold Standard of Smart Water Metering

Smart water metering now goes beyond standard data collection. iPERL+ offers increased data logging memory for full harmony across your entire water system. With the options for polymer or metal flow tube casing for all meter sizes, you can select which material works best for your utility.

iPERL+ will be available for your utility in 2024.

## Increase Your Data, Increase Your Revenue

Our smart water meters improve your meter accuracy while maximizing your operational efficiency. With more insights on customer leaks and other alarm thresholds, you'll save time and money - meaning you'll drive additional revenue.

iPERL+ contains several smart water alarms to help you detect issues in your distribution system. With configurable alarm thresholds for continuous flow, high flow, and reverse flow, you can detect issues within your system before they cause larger problems.

With the capability to log 120 days of data, you're able to dig into past trends and analyze data more than ever before.

## The iPERL Promise

iPERL+ water meters maintain their accuracy over a 20-year lifetime. With Advanced Metering Infrastructure (AMI) connectivity—as well as 14 condition, diagnostic and lifetime alarms—iPERL+ meters provide a quick resolution to issues you may experience in the field.

Benefits to you:

- Improves operational efficiency and customer service
- Reduces non-revenue water with flow registering as low as 0.03 gpm (0.007m<sup>3</sup>/hr)
- Reduces maintenance and cost
- Installs horizontally, vertically, or diagonally
- Allows remote management, monitoring and diagnosis
- Collects and logs system and customer data for up to 120 days

Available sizes will include: 5/8", 5/8" x 3/4", 3/4" and 1".
