

2-PART SNAP-LOCK COUPLING SOLVENT WELD COUPLING

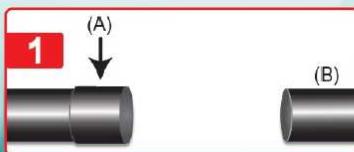

FEATURES:

- Creates a permanent bond
- Faster & Easier than alternatives
- Use when pipes are stationary
- A true butt-to-butt solvent weld connection
- Easy to cut in a Wye or Tee to an existing pipe without use of flexible rubber couplings
- Great for remodels / additions
- Designed by a master plumber

 PROUDLY MADE
IN AMERICA

PATENT # 10774964, 11022243, & 11624462

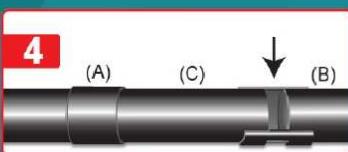

Adhere necessary fitting
to pipe (Coupling, Wye, Combo, 90, etc)

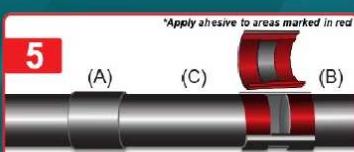

Measure from face of hub (A)
to face of pipe (B). Cut pipe (C)

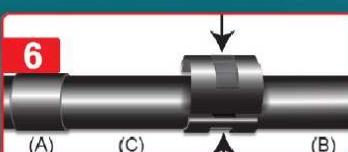

Insert pipe (C) between A&B.
Test fit & adhere into fitting (A)
(Pipe (C) should slip between A & B without use of force)

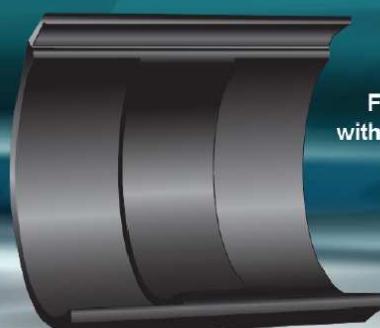

Using 1/2 of Exact Fit coupling
dry fit between pipe B&C
then remove

Apply adhesive to pipes B&C and
both halves of Snap-Lock Coupling
*Apply adhesive to areas marked in red

Install both halves of Snap-Lock
Coupling to pipe B&C. Ensure
both halves snap-lock together
(Use pliers if necessary to lock fitting)

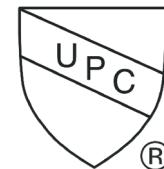

FAST & PERMANENT SOLUTION
without compromising inside diameter
