

ecocirc[®] 20-18 & ecocirc+[®] 20-18

THE NEWEST GENERATION VARIABLE SPEED ECM SMART CIRCULATOR
FOR HEATING, COOLING AND POTABLE WATER SYSTEMS

ECO20-18FAMBRO R3

A reliable, highly-efficient, easy-to-install and simple-to-use smart circulator

The ecocirc® 20-18 is a highly-efficient variable speed ECM circulator available for both hydronic heating and cooling systems, as well as potable water systems. It features a maximum shutoff head of 20 ft., or a maximum flow of 18 GPM, making it suitable for most residential systems. The ecocirc+ 20-18 models allow for wireless connectivity directly to a smartphone for full control. With its ability to replace up to 70 pumps currently in the market, the ecocirc 20-18 leaves no concerns for finding a suitable replacement on the job site.

Simplicity

Replace up to 70 different pumps on the market, which reduces inventory both in warehouses and on trucks, making it the simple solution for nearly any application.

Adaptability

Equipped with the most modes and the widest fluid temperature range. This allows it to serve both heating and cooling applications, working in a multitude of applications.

Efficiency

Industry leading efficiency at EEI levels at or below 0.18. The night mode and eAdapt features also help optimize energy consumption while letting you tailor the pump to the end user's application.

Connectivity

Bluetooth® connectivity (+) gives the user total control from a smartphone. It also maximizes the hydronic system, either through automated energy saving features or through the 0-10V input.

ecocirc 20-18

One control knob, three control modes

The standard ecocirc 20-18 models include options for either cast iron or stainless steel pump housings. Like all ecocirc 20-18 pumps, they are easy to set up and operate with "just one turn." The interface gives you all the information you need, with a multicolor LED to indicate pump status.

ecocirc+ 20-18

Higher visibility, functionality and connectivity

Our more advanced ecocirc+ 20-18 range takes the idea of smart simplicity to a whole new level. Equipped with the same functionality as the standard ecocirc 20-18 range, these models all come with a three-digit display, communication via **Bluetooth** wireless technology, for external monitoring, Night Mode and eAdapt to ensure optimal comfort at minimum cost.

One model with nine different settings can solve a multitude of applications

Performance targeted to individual applications is delivered across a broad spectrum of settings.

Performance

Constant Pressure Curve

Proportional Pressure Curve

Fixed Speed Curve

Two highly-efficient versions

Features	ecocirc 20-18	ecocirc+ 20-18
Performance and Construction:		
Delivers maximum performance of 20 ft of head and 18 gpm	✓	✓
Maximum power of 70W	✓	✓
Designed for both heating & cooling with fluid temperature of 14-230°F	✓	✓
Insulation shell included	✓	✓
Check valve included	✓	✓
Control Modes:		
Proportional pressure mode ($\Delta p-v$)	✓	✓
Constant pressure curve ($\Delta p-c$)	✓	✓
Constant speed curve	✓	✓
Constant pressure mode	✓	✓
eAdapt auto learn and night mode		✓
Constant T or ΔT temperature control modes		✓
Automatic air purge	✓	✓
System Protections:		
Complete integrated system protection (via CircGuard™)	✓	✓
Pump Readings, Settings and Display:		
Multi-color LED display for easy reading	✓	✓
Turn knob for easy setup of the pump	✓	✓
Digital display panel		✓
Operating status notification		✓
Warning and alarm notification	✓	✓
Errors and work log history		✓
Dry run protection (via CircGuard)	✓	✓
Input/Output:		
0-10V input only		✓
1 x external temperature sensor input		✓
Communication and Monitoring:		
Bluetooth communication with a smartphone		✓

Applications

ecocirc® 20-18 provides a superior product for both heating and cooling as well as potable water, applications including:

- Gas Boilers
- Oil-Fired Heaters / Boilers
- Wood Heaters and Pellet Boilers
- Heat Pumps
- Heat Transfer Stations / Mixing Units
- District Heating
- Heat Interface Units
- Domestic Hot Water Systems
- Fresh Water Modules

Service and support from the most trusted name in the industry – Bell & Gossett.

The Bell & Gossett name has always stood for uncompromising quality and dependability. That's evident in the way every one of our pumps is built and backed by our outstanding customer service and support team.

Your local Bell & Gossett representative is available any time and is an experienced professional with a wealth of technical expertise. In addition to expert system and product application assistance and a wide product inventory warehoused locally, we offer ESP-Systemwise software selection program.

ESP-Systemwise is a Bell & Gossett web-based software that helps you design HVAC systems accurately, effectively and very quickly. You get fast, precise equipment selection, pump performance curves and equipment schedules, submittals, specifications and more.

ESP-Systemwise includes:

- Pumps
- Expansion Tanks
- Replacement Parts
- Air/Dirt Separators
- Heat Exchangers
- Suction Diffuser and Triple Duty Valve
- Drives and Controls
- PIC Valves
- Wastewater/Stormwater

Bell & Gossett Little Red Schoolhouse®

We are known throughout the hydronic hydronic HVAC business business as the industry's educator. Our Little Red Schoolhouse, a completely equipped learning center, has trained more than 60,000 engineers, contractors and installers in the proper design, installation and maintenance of hydronic and steam systems.

Opened in 1954, the Little Red Schoolhouse offers seminars covering a wide range of topics tailored to different occupations in the industry. Attendance is by select invitation only. Graduates of the Little Red Schoolhouse can be found throughout North America, as well as Europe, Middle East, Asia, Latin America and Australia.

The Bell & Gossett Little Red Schoolhouse is an Accredited Provider by the International Association for Continuing Education and Training (IACET) and is authorized to offer IACET CEUs for its programs that qualify under the ANSI/IACET Standard. The Little Red Schoolhouse has also been approved by the Green Building Certification Institute (GBCI) as a provider of continuing education for LEED professionals.

For applications to attend these seminars, please contact a Bell & Gossett Representative in your area. They will facilitate the arrangements to attend.

We offer both in-person, remote and on-demand courses, many of which are CEU eligible. To learn more about these opportunities, please explore our Training & Education resources found here: <https://learning.xylemsales.com/training-center/>

Xylem |'zīləm|

1) The tissue in plants that brings water upward from the roots;

2) a leading global water technology company.

We're a global team unified in a common purpose: creating advanced technology solutions to the world's water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services settings. Xylem also provides a leading portfolio of smart metering, network technologies and advanced analytics solutions for water, electric and gas utilities. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.

For more information on how Xylem can help you, go to www.xylem.com

We value your feedback. Please take our 3 question survey at **bellgossett.com/survey** to let us know how we are doing.
