

My proposal aims to illustrate the concept of community by incorporating fantasy characters alongside real animals. I believe that utilizing fantasy elements can be a captivating way to convey the essence of togetherness and community, provided that we maintain a strong focus on portraying the spirit of such. My intention is to capture our audience, particularly the younger demographic, through vibrant colors, dynamic movement, and a contemporary cartoon style.

Currently, I have included only one side due to the amount of time required for the artwork, not knowing the actual dimensions and no guarantee of selection. I have chosen to wait for feedback from the committee before finalizing the project. With my experience in the sign industry I know I can give you precise art if and when it is needed.

Your input is highly valuable, and for the sake of flexibility I am also open to incorporating any suggestions or additions you may have.

In the event that my proposal is chosen, I have plans to depict the opposite side, showcasing the essence of downtown Sumner life. Additionally, I intend to highlight one or a few characters on the ends of the box in the same fashion. I eagerly await your feedback and suggestions as we move forward with this project.
