

# Fanno Creek Trail

## Crossing at Scholls Ferry Road

# SURVEY RESULTS

Thank you to everyone who participated in the Fanno Creek Trail Crossing at Scholls Ferry Road virtual open house! The high level of community interest in finding solutions to deal with the frequent flooding of the trail was clear from the 533 surveys received. A majority of people supported the proposed at-grade pedestrian crossing.

**500+** Surveys  
Received

**65%** Supportive of  
the proposed  
crossing.

The new signalized crossing will be coordinated with the rest of the signals along the corridor to minimize the motor vehicle traffic impact along SW Scholls Ferry Road. While a new pedestrian signal would not improve congestion and could add an additional stopping point along SW Scholls Ferry Road, engineering studies show that it should not have a significant impact on traffic, since the flow is more controlled by the [larger intersections along the corridor].

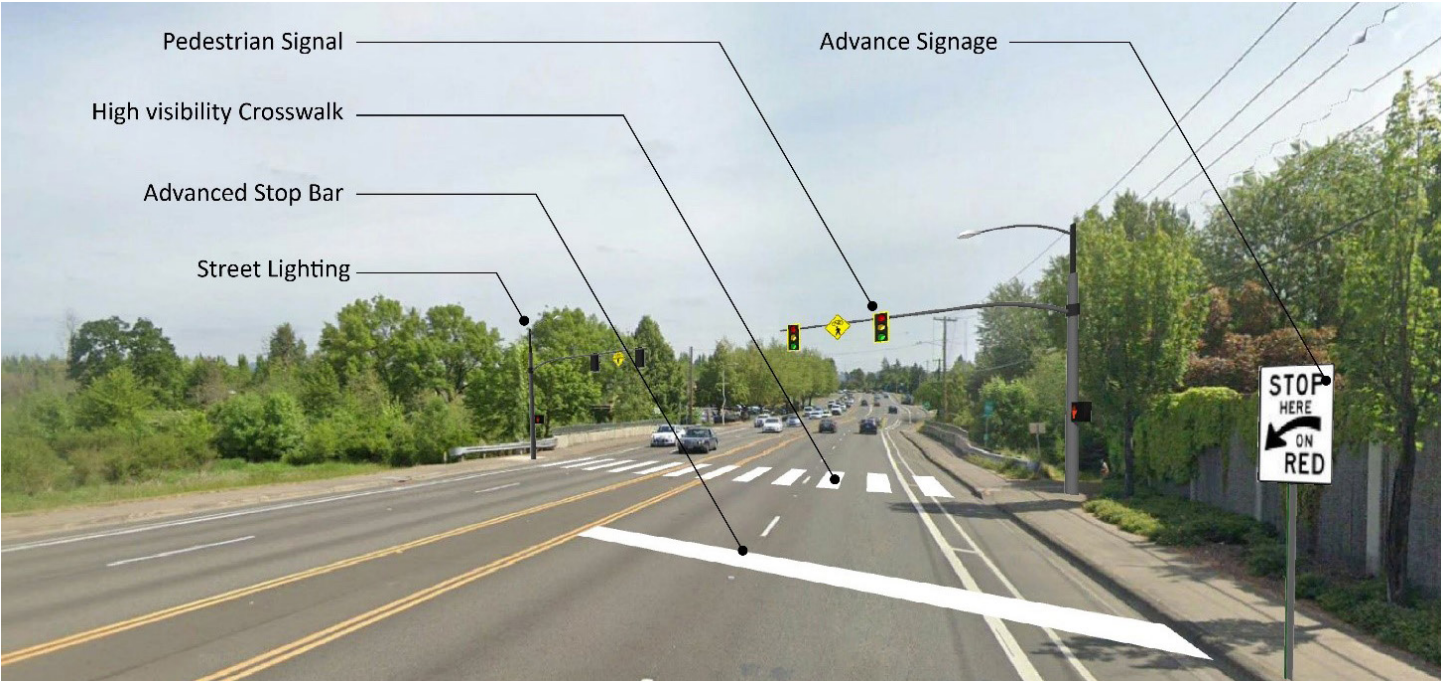

We are thrilled that Clean Water Services continues to make progress to raise the trail under the roadway to keep the surface above water more often – construction is anticipated during dry conditions in 2021. The undercrossing will remain open, when not flooded, even if an at-grade crossing is installed.

The undercrossing  
will remain **OPEN**

**NEXT** Grant funding  
for design and  
construction.

Based on the community support seen in the open house, the partner agencies (Beaverton, Clean Water Services, Tigard, Tualatin Hills Park & Recreation District, Washington County) will pursue grant funding opportunities for the design, easement acquisition, and construction of the at-grade crossing. We will be in touch whenever there is news to share.
