

Board Report for **August 28, 2018**

Current/Proj Enrollment <i>Δ from Aug 28</i>	New Initiatives or Developments	Current Needs or Concerns	Excellent or Praise Phil 4:8
<p>45</p>	<p>We have had a very productive summer! New exterior paint on our classrooms has truly spruced up the curb appeal. Updating the interior of one of our portables with new carpet/vinyl and paint has proven to be a BIG task ... but well worth the effort! We are so THANKFUL for the donation!!</p>	<p>Enrollment trickles in as the first day of school approaches. Our JK and 1 year old class will start out completely full. Praying the other classes fill up with cute kids as well.</p>	<p>Praise GOD for an amazing group of teachers and assistants!</p> <p>So, thankful for the opportunity to share JESUS with all of our families!</p> <p>Overjoyed with the generous donations to help with improvements to our building.</p>
<p>52</p>	<p>MVPC passed its annual inspection with flying colors. Thanks to Carol and Jenifer Fenn for giving me enough guidance so that I could answer questions and pull appropriate files to satisfy the inquiries of the inspector.</p> <p>I have delivered a first pass on proposed weekly schedules for teachers, which includes new lunch and recess protocols, in addition to supporting class and library times.</p>	<p>MVPC staffing is critical right now. Some of our teachers are leaving for college or other jobs, leaving <i>four</i> vacancies open. We have had a handful of resumes, but not enough. Those we have had are disappointing with our pay rate, as the going rate for preschool teachers is closer to \$14-16/hour. We pay \$12-13. So far, 50% tuition reduction and health care has not been enough to sell the position.</p>	<p>Jenifer Fenn and Traci P have been huge helps in coming to speed. I had a full month to focus on preschool and she was amazing. She really stepped into the lead role efficiently and has been very patient with me learning the ropes.</p>
	<p>MVE+MVPC=MVC By combining the leadership roles of the elementary and the preschool childcare</p>	<p>Enrollment Matters Campaign Word of mouth' is the number</p>	<p>Now that Traci is back, it's great getting to know her and learning all about the details.</p>

<p style="text-align: center;">58</p>	<p>program, we have the opportunity to bring the programs together thereby sharing resources and ideas. Toward that end, our music and lower elementary computer teachers will have some time with the 4 year old JKs, and we will have a special day(s) when the new Kinder teacher will swap for a bit with the JK teachers (the goal of which being to improve the connection between childcare and elementary in hopes of increasing the number of students that continue into Kindergarten).</p>	<p>one method of marketing for Christian schools. My thought process was that to increase word of mouth, we need to well support our new, younger families. Millennials and other young families to everything on their phones. I am looking into a customized app that runs on Android and iOS that will provide an array of tech-smart features</p> <p>Still doing research to find the right feature/cost equation.</p>	<p>elementary. Now that sc about to start, I feel much confident about actually I able to do my job thanks two.</p>
<p style="text-align: center;">126</p>	<p>The portables are painted and the trim is being finished. It looks very nice. The Maker Space is prepared and we're beginning to install the components. Wiring will happen soon. We've been painting hallways, classrooms, removing some of our lockers and tidying the place up. I'm really excited about the Curb Appeal.</p> <p>Also, most of our teachers have been putting in the work for our Make-It, Take-It times to align our lessons with our newly adopted standards. I'm excited by the conversations that have been happening. We are bringing on two new to us teachers. Madison Collins in 2nd Grade, as Kristin Meier has relocated to Arizona; and Laura Carlson in 4th grade replacing Brett Ramsey, who has become our Maker Space Teacher..</p>	<p>Enrollment is still trickling in, but we're down from last year.</p> <p>Last year, Marybeth Sipe blew out her Achilles tendon and is still recovering. She'll be able to teach her classes, but is still regaining her mobility.</p> <p>We have 3 substitute teachers for KVE as of now. We could use about 3 to 5 more available substitutes.</p>	<p>For all the work being done around campus. The plan is great.</p> <p>Teachers are excited about teaching and some great conversations going on about just the standards, but the teaching.</p>

	47	(See above) All of the staff are returning and I'm very encouraged by their work on aligning their unit plans to our adopted standards.	Like KVE - we are in need of substitute teachers.	The campus is really nice! I'm very grateful for the staff who worked this summer. I'm excited to see what our students will do this year.
	88	As we settle in to a new (original!) campus, we are grateful for the Lord's provision for a home for RCHS. New campus means a new set up and configuration, but it will allow our teachers to have their own spaces, and own their classroom. Lots to do, and the trucks arrive shortly!	We are within our "usual" range of enrollment numbers and goals. 88 is a little lower than normal for Aug 13th (even knowing we pick up a handful of late students for the Fall). Still working to recruit new students, and praying for the Lord's provision.	As of this morning (8/13) we have a verbal commitment on our staff position! All areas have been filled, and we are excited to teach and minister to the needs of these students for the school year.

Total Enrollment 08.20.18
 Projected Enrollment 440

y		Completely tearing down & rebuilding all three labs / Maker Spaces and relocating the high school has made for a busy summer technology-wise. We're still working to complete things but I believe we're on track for the start of school. Both elementaries will have newly refurbished PC's in their Maker Spaces and the MVE staff will be getting them as well, thanks to a generous donation from the Bunker family. We've also upgraded all campus Internet connections to 4X the	Hardware Replacement Plan; Much of our equipment is very old and susceptible to failure in the near future, from the staff PC's at 2 of our campuses to the HS lab and most importantly, all of our on-premise servers. We've become more & more dependent on technology, but we haven't budgeted for any capital expenditures in this	Thankful for the Bunker family's support of the Maple campus! Also very thankful for Zel & Alex Midrigan for stepping in during my vacations and with tech needs.
