

### SHOP CAPABILITIES

- Three Spray booths – 60'L x 32'W x 20'H
- Two Sandblast booths – 80'L x 30'W x 22"H and 60 x 20 x 18
- Cranes, lifts and other equipment required for a full range of steel fabrication services.
- 10 forklifts ranging from 5-20 ton lift capacity
- The wheel – LS Industries MONO BL 48X84 Structural 4 wheel blaster.

### 75,000 sqft of shop space (440' x 110' clear span)

- 6 acres laydown/storage space
- FabSuite software for total Fabrication & Project Management
- Centrally located in Seattle-Tacoma to suppliers and shipping ports

### SHOP EQUIPMENT: (STEEL FABRICATION)

- 110' Overhead crane
- 15 – JIB cranes for welder workstations
- Multiple fork-lifts up to 30,000 lbs
- Peddinghaus CNC 3 spindle Drill Line
- Peddinghaus Plate Processor
- Ironworkers up to 175 ton capacity
- Hydraulic Break
- Hydraulic beam straightener
- Saws up to 44" capacity
- Stud Welders
- Hydraulic Pipe benders

## Purpose

### Rebuilding America's Infrastructure in the 21<sup>st</sup> Century

ST Fabrication's TEAM of estimators, project managers, detailers, and shop personnel to consistently bring quality projects together for our Company's diverse customer base.

Incorporating 21st Century technology into their processes, the highly experienced team has built on the quality traditions ST Fabrication has been known for and significantly expanded our Company's scope and capacity.

## LEADERS IN FABRICATION AND INDUSTRIAL COATINGS

### Mission

***Building Communities with STEEL!***

We do this consistently by understanding and meeting the needs of our customers by delivering high quality products and services with an emphasis on:

- Project Management
- Safety
- Quality Control
- Schedule
- Value Engineering
- Competitive Pricing
- Sandblasting & Coating

Our knowledgeable craftspeople are experts at sandblasting and coating to industry standards, as well as meeting any special customer needs

**Randy Litch**  
**Industrial Coatings and Sandblasting Foreman**

**CELL:** (206) 214-7717

**EMAIL:** [rlitch@stfab.com](mailto:rlitch@stfab.com)

With extensive knowledge of SSPC and NACE standards we can ensure the integrity of your coatings systems.

Our QC/QA program is comprehensive and 100% documented.

**Including: (non-destructive)**

- Chloride Testing
- Blast Profile Testing
- Wet Film Thickness Readings
- Dry Film Thickness Readings
- Electronic Atmospheric Condition

**Recording:**

- Product Batch Number Recording
- Daily Progression Photos

**Destructive:**

- Adhesion Testing
- Tooke Gauge

- Zinc Rich Primers
- High Solids Epoxies
- Polyurethanes
- Enamels
- Ablative Antifouling Systems
- Polyester Styrene
- Intersleek Silicone Coatings
- Plural Component Epoxies
- Non-skid Deck Coatings
- Rubberized Deck Coatings
- Potable Water Tank Coatings
- Fairing Compounds
- Acrylic/ Latex
