HOW TO: Email a Single Page of a Report

There are times when you may want to email a specific page or a set of pages of a report to a client instead of the entire report.

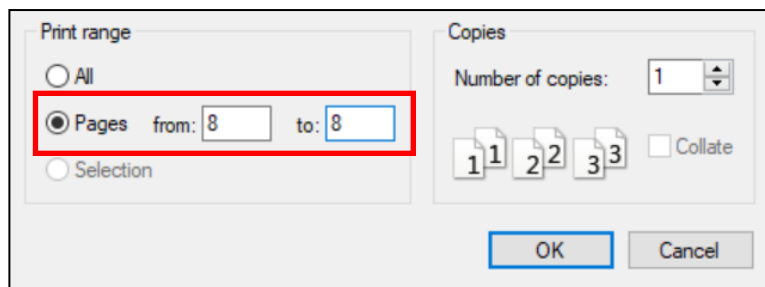

1. With your inspection file open, click on File -> Print.

2. Next, we have a screen that allows us to choose our printer as well as what pages we want to print. Here, we want to select our PDF writer. For this example, we'll select Microsoft Print to PDF.

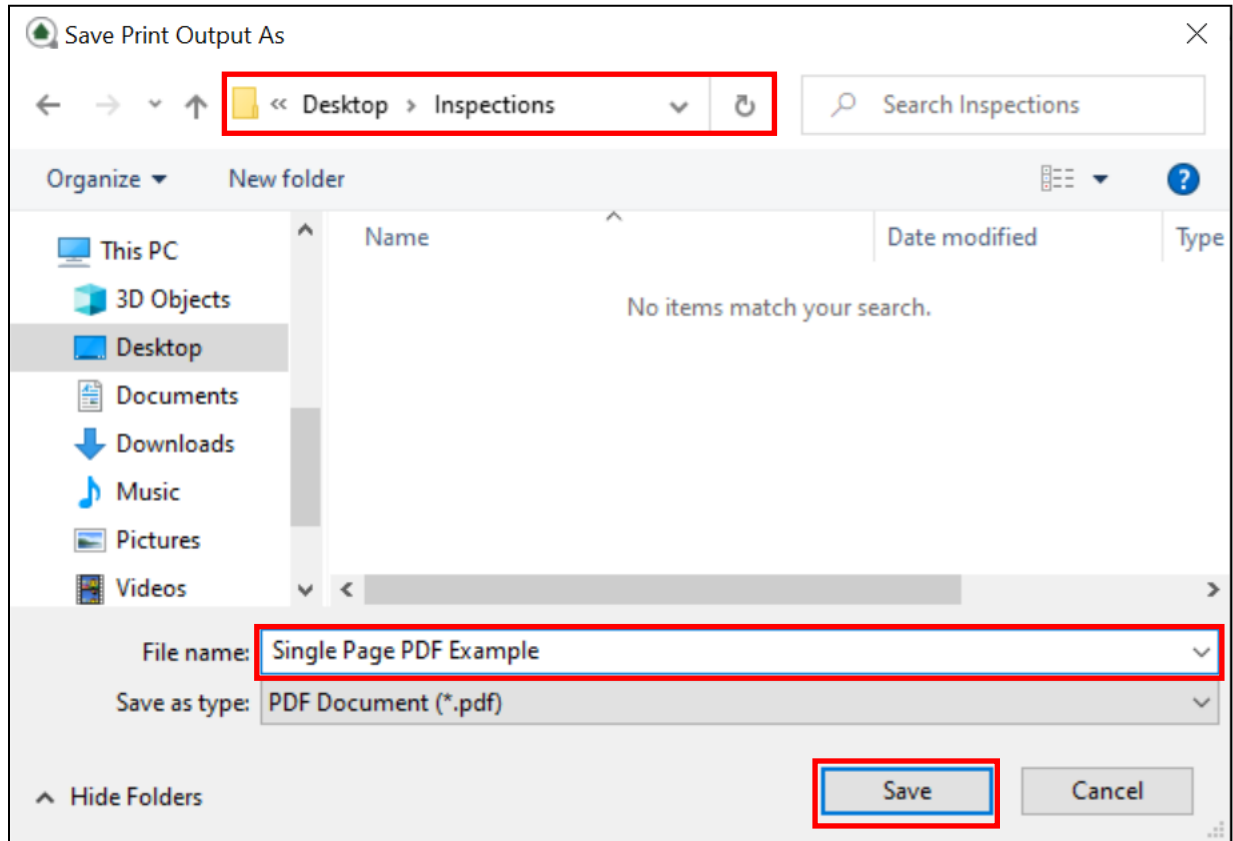

3. Now, select which page(s) that you want to email and click 'OK'.

HOW TO: Email a Single Page of a Report

4. A window will appear prompting you to give the PDF that you are creating a name. You can name the PDF whatever you would like and choose where you want to save it. When finished naming it and selecting its location, click 'Save.'

5. The PDF of the page(s) you selected will now be created. The last step is to open your email, start a new message, attach the PDF and send it.
