# HOW TO: RUN UPDATES FOR THE PALM-TECH APP ON IPHONE/IPAD

**Your iPhone or iPad will let you know when an update to an app is available. Depending on your device and your settings this will work differently on different devices. You also may have the option to have the Palm-Tech app update automatically so you are always on the latest update.**

1. First, you can tell if there is an update available because you will see a small number next to your App Store icon on your device. This number is the number of apps that currently have updates available.

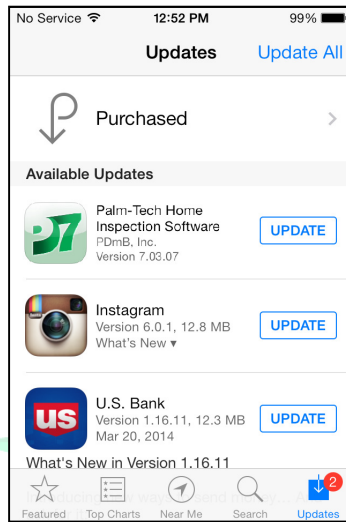

2. Next, tap on the App Store icon and then tap on the button for Updates. This may be at the top or bottom of the screen depending on your device.

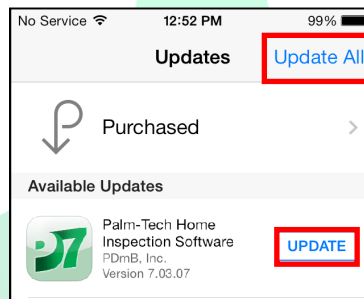

## HOW TO: RUN UPDATES FOR THE PALM-TECH APP ON IPHONE/IPAD

- Here you will see all of the apps that you have installed on your device that have an update available.

- To update the Palm-Tech app, tap 'Update' next to Palm-Tech. Or you can update all of the apps here by tapping 'Update All'.

- When Palm-Tech is finished updating, you will have an option to open the app.
