Support section of our website: www.palm-tech.com/support/

HOW TO: IMPORT VERSION 5 DATA INTO VERSION 7 ON WINDOWS 10

To import your Version 5 data to Version 7 of Palm-Tech, you must first install Palm-Tech 6 and import the V5 Data into Version 6:

1. Download version 6 on the same PC that has version 5 - <http://www.palm-tech.com/files/Setup6.exe>
2. Once version 6 is installed onto your computer, it will prompt you to import your version 5 information into version 6. If it does not, then click on the Windows symbol (bottom left hand corner of your PC)>All Apps>Palm-Tech>Import Version 5 Data
3. Follow the on-screen prompts until the import is finished.
4. To confirm the import was successful, start a new inspection in version 6 and check a few dropdowns. A good place to check is the City dropdown in the General Information.

If you haven't installed Version 7 on your PC yet, Follow the steps in the setup email you received from us to install Version 7.

If you no longer have your setup email, Please select this link to fill out the license update form: http://palm-tech.com/support/license_request.php
We will then process it and send you out your license and install instructions the following business day.

If you already have Palm-Tech Version 7 installed, follow these steps to import your Version 5 library after you have imported it into V6 following the first set of steps in this how to guide:

1. Open up Palm-Tech Version 7 on your PC
2. Click on Support in the bottom left-hand corner
3. Click on Program Settings
4. Click on "Import from V6"

You have now imported your Version 5 Data into Palm-Tech Version 7
