HOW TO: REVIEW THE INSPECTION SUMMARY STATS

Palm-Tech creates a list of 'inspection summary stats' for each inspection. These stats can be a quick and helpful reference to let you know the contents of the inspection.

1. With an inspection open, the first step is to click the review tab in the lower left corner.

2. This brings up the 'Review' tab. On this tab you'll see a list of inspection statistics. This includes information such as: how many items have not been filled out, how many items are going to the summary, how many lines and categories are in the inspection and more.
