How To

**Working with VMware
and Parallels**

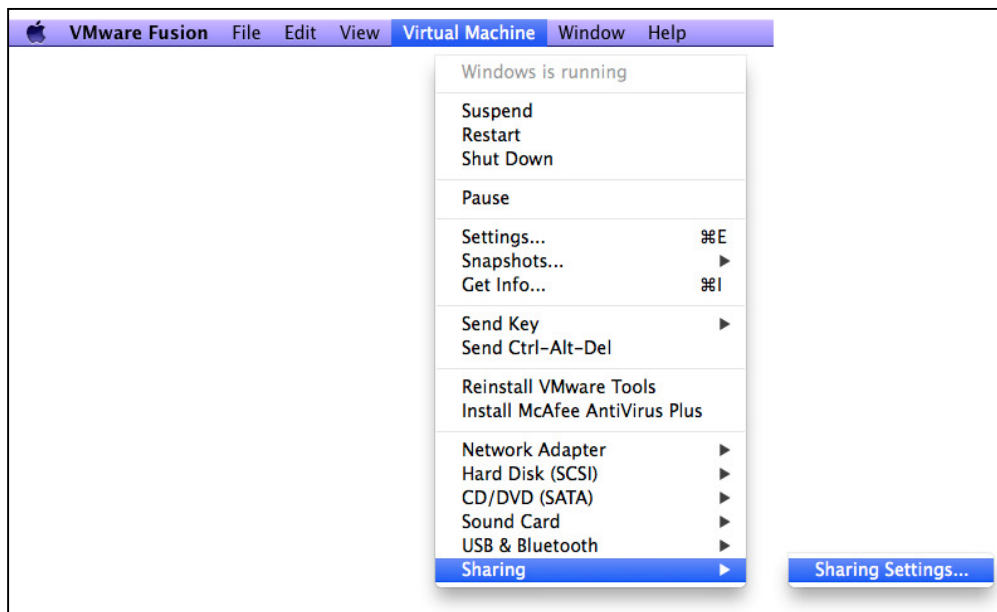

This How To will walk through how to fix a sharing issue when using VMware or Parallels

For a complete list of available How To documents visit the

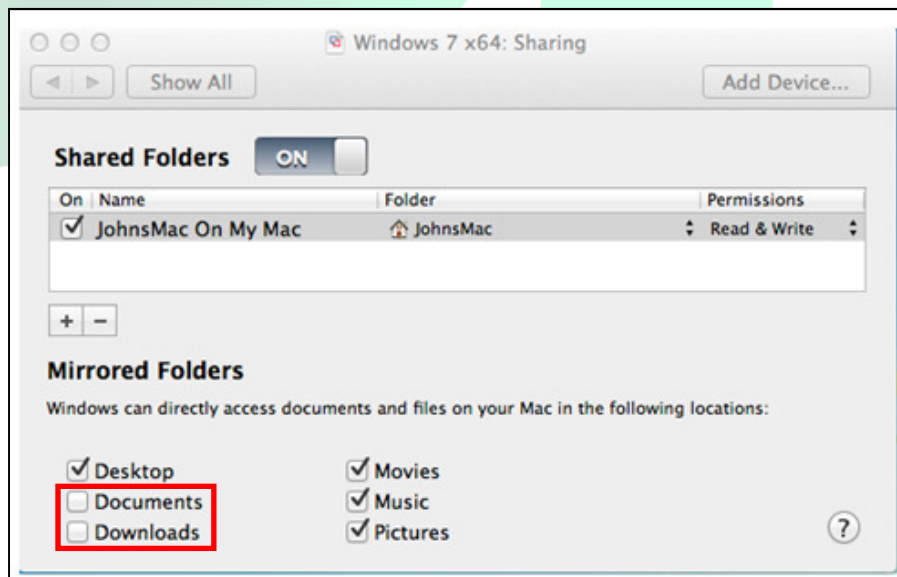

HOW TO: WORKING WITH VMWARE AND PARALLELS

The instructions below describe how to fix the sharing issue when running VMware. If you are seeing the issue with Parallels the steps should be similar, but may be labeled differently or appear in a different place on your PC.

1. In the VMWare header bar, select Virtual Machine.
2. From the pull down, select Sharing.
3. From the right sub menu, select Sharing Settings.

4. From the Sharing Settings dialog, uncheck Documents and Downloads.

How To: WORKING WITH VMWARE AND PARALLELS

5. Make certain that the installation folder (usually "Downloads") is on the local C: drive.
6. Next, you'll need to log off and back on for the changes to be applied.
7. Once finished, everything should work properly!
