HOW TO: CHANGE WHERE PICTURES ARE SAVING ON AN ANDROID DEVICE

You have the ability to choose whether pictures are saved on your actual Android device or on a storage card that is plugged into your device. If you have it set to have pictures go to the storage card then it can cause an issue with pictures being able to be added in to the Palm-Tech app. This document explains how to change where pictures are being saved. It is important to note, that making this change will impact where all of the pictures you take with your device are saved, not just the ones you take from within Palm-Tech.

1. The first step is to go into the device's camera and tap the settings button.

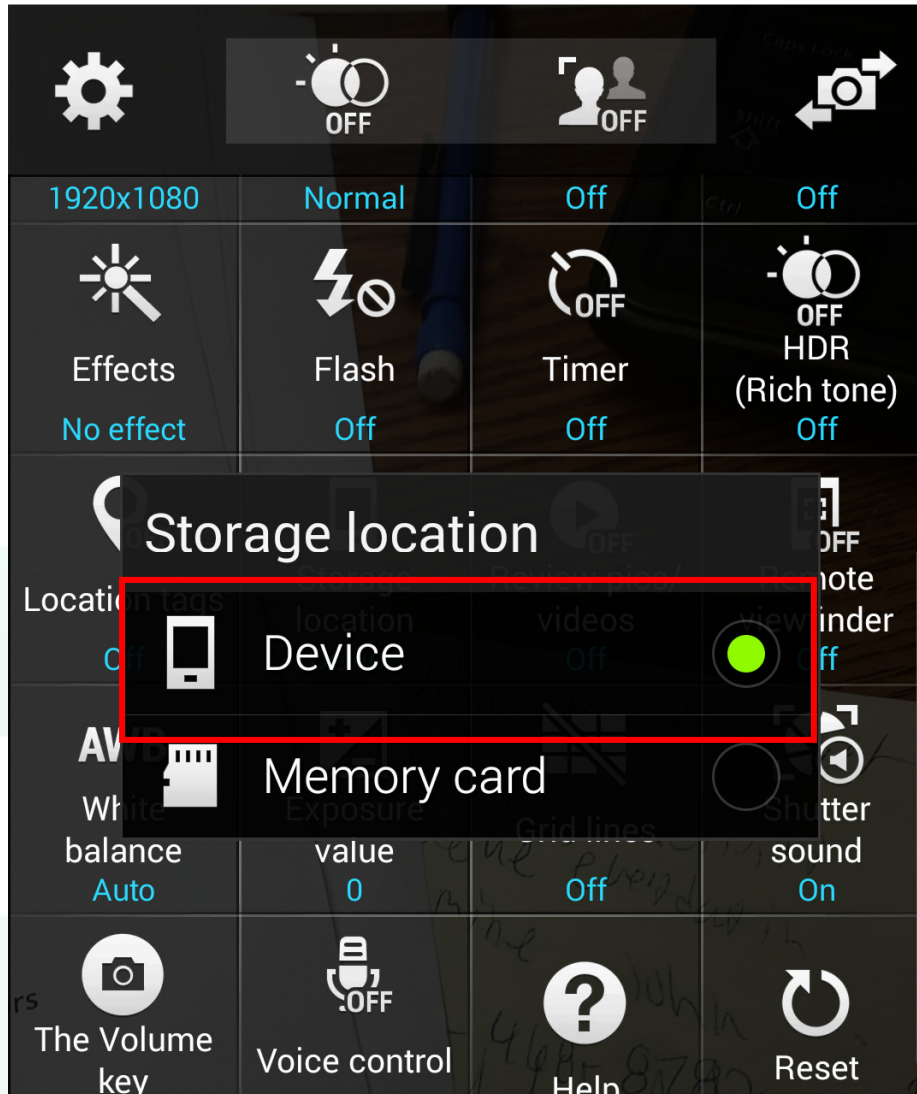

2. Next, tap on "Storage Location".

HOW TO: CHANGE WHERE PICTURES ARE SAVING ON AN ANDROID DEVICE

3. Change the *Storage location* from "Memory card" to "Device."

4. You can now open the Palm-Tech app and add pictures into your inspections.
