

# How To:

## Set all Pictures to Print Underneath Lines

**This step by step How To article explains how to set all pictures to print underneath lines instead of some pictures showing up to the right of a line.**

# How To: SET ALL PICTURES TO PRINT UNDERNEATH LINES

If there are multiple pictures on a line, they will always show up underneath the line. If there is only one picture on a line then you have the option to choose if this picture shows up underneath the line or to the right of the line.

1. First, go to 'Print Settings' by clicking on the Print Settings icon.

2. Click on the 'Fonts' tab.

3. Here there is an option for 'Photos start on new line'. If this option is checked then all photos will show up under the line they are added to. If this option is unchecked then a single picture on a line will show up to the right of the line.
