

Fiber Optic Continuity Tester

The FOFS Fiber Optic Continuity Tester is an excellent tool for fiber identification when multiple fibers are present. Simply connect your ST, FC, or SMA connector to the adapter and push the on/off button. The red LED light is transmitted down the fiber and escapes through the other end. The unit operates on two supplied AA batteries. The durable rubber packaging easily stores in a tool box. The continuity tester is a low cost, high quality unit.

FEATURES:

- Rugged Rubber Clad Housing
- Bright Red LED Light
- Battery Operated

Specifications:

Visible Light	Red LED output ~ 1.2 millicandescents
Range	~ 2.5 Km in multimode ~ 1 Km in singlemode
