

## Hybrid Female to Female Fiber Optic Adapter

### Descriptions

The optical fiber adapter (is named flange plate) is the optical fiber flexible jumper docking connection part. This series products great variety of goods, including FC, SC, ST, LC widely uses in the optical fiber distribution frame (ODF), the fiber optic communications equipment, the measuring appliance and so on, the stable property is reliable.

### Available Range

- CATV system Networks and Data communication Networks
- Local Area Networks and Telecommunication Networks

### Features

- Stable capability and high reliability
- Precise connecting
- Outstanding Mechanical characters
- Human-centered Design
- Precision phosphor bronze or zirconia sleeve
- Material such as Nickel plated brass body, Kirksite, Plastic could be optional

### Specification

Hybrid Female to Female Fiber Optic Adapter		
	Data	Unit
Insertion Lose	$\leq 0.2$	dB
Interchangeability	$\leq 0.2$	dB
Repeatability(500 times)	$\leq 0.2$	dB
Operating Temperature	-10℃~+75℃	℃
Storage Temperature	-40~+85	℃
