

Carnation-Duvall Citizen Corps Annual Drill
Saturday, September 26, 2020, 10AM-Noon
Location: Online via Zoom

Exercise Overview

Hazard: Tolt Dam failure and subsequent flooding

Location: Carnation, Washington

Duration: 2 Hours

- 10:00-10:15 Introduce exercise
- 10:15-10:45 Break into rooms to develop Incident Action Plans
- 10:45-11:00 Close rooms, review plan as a group
- 11:00-11:30 Break into rooms for injects
- 11:30-12:00 Review team responses to injects / hot wash

Capabilities Exercised:

- Incident Command
- Team Responses: CERTs, MRC, SnoVARC
- Development of Incident Action Plan
- Responses to injects
- Scene management
- Size up

Exercise Objectives:

- Assess plans and develop protocols for communicating between the Emergency Operations Center, CERT Command Post, between team members, the Medical Reserve Corps, and SnoVARC.
- Validate the decision-making process to prioritize incidents.
- Evaluate the procedures for managing responses in a disaster area.
- Validate team size up procedures.

How Does a Zoom Drill Work?

As a participant, you will be in a digital room with your peers (people in the same program as you). Together you will consider the situation and develop a plan. Facilitators will be there with you to help discuss the plan, and to keep things interesting your team will have to adapt to unexpected challenges. After the exercise, the participants will all get back together to discuss the exercise and share lessons learned.

Participant Requirements:

- Computer or similar internet connected device with Zoom access
 - New to Zoom? [Getting Started with Zoom](#)
- Be a badged member of a CDCCC Program (MRC, CERT, SnoVARC)
