

Addendum to EmComm Winlink Thursday July-29-ICS213 USB-File V1.2 Instructions:  
July 27, 2021

**Situation:**

When saving the **ICS 213 data 2021-07-xx.txt** file on the Agency's computer by hitting the **Save ICS213 INITIAL Data** button in the ICS 213 form, your browser will determine where that file is saved, rather than saving it directly to the USB drive. This will happen if your browser uses a default location for downloading files. Most Windows 10 computers will have this default set to your windows Download folder.

**Resolution:**

So, the **ICS 213 data 2021-07-xx.txt** file will be found in the Downloads folder, and the Agency user will have to use File Manager to move that file to the USB drive.

**Non-issue:**

If you have changed the Browser default download folder on the Agency's computer to make the browser Prompt for which folder to use, you will be able to select the USB drive as you save the data in the ICS 213 form directly.

Also, In the Data for the form:

Please change the Approval fields from:

**Approval: John Drill      Position: Incident Commander**

To:

**Approval: Susan Right    Position: Taskforce Manager**
