

2120 SANITARY PLATFORMS

Integrating worker safety and ergonomics with robust hygienic design, providing ease of access for Production, Sanitation and Maintenance.

FEATURES

- Heizen Channelized™, fully welded, stainless construction provides line-of-sight access for inspecting, testing and cleaning.
- Sloped, self-draining surfaces wherever possible.
- Minimal use of bolts and other loose hardware. Utilization of spacers and tabs reduce lamination.
- Formed 45° corners provide large radii for ease of cleaning and sanitation.
- Large, wash-through passages throughout eliminate blind pockets on inside corners, allowing ease of flushing and drainage.
- Downspouts, where required, provide controlled passage of fluids to the floor drains and are disconnected from the deck by an air gap to eliminate migration of potential contamination.
- Design combines all applicable codes for worker safety and are zone defined, hygienic, food-safe construction.

OPTIONS/SPECIFICATIONS

- Standing surface options include diamond plate and other non-slip treatments.
- Handrails, stairs and ladders all incorporate necessary and required features by code and area zone definition.
- Large floor connections utilize elevated, slope-sided grout support and stainless hardware in epoxy embedment.
- Small floor connections utilize *Patented* Heizen thread-less, Sanitary Adjustable Food Pads

PRODUCT APPLICATIONS

- Scale Decks
- Catwalks
- Raised Production Lines
- Sanitation Access
