

2410 WASH SYSTEM

Incorporate Heinzen's full featured Wash System as your core process cleaning and chilling system.

FEATURES

A Wash System begins, with Laminar Flow, where product is introduced into the line. An HR-Zone immediately follows, 6 to 12 jets bubble & agitate the water into a full-clean wash bath. A sand trap catches any debris churned up by the HR-Zone, a clear view tube is optional. The above system is shown with a rotary drum cleaning reel in the first wash, then into a dewatering shaker.

Featured system shows a double wash with the shaker feeding a reverse belt conveyor into Spin Dryer baskets.

PRODUCT APPLICATIONS

Leafy Greens • Tender leaf Products
