

2528 BASKETS AND BASKET CARTS

For over thirty years, the industry benchmark for safe, fresh-cut produce centrifuge material handling, includes the Heinzen SD300 Basket & Carts.

BASKET

- Patented, industry leading, safe 'bottom dump' design does not require inverting baskets to unload. Material is loaded from above, centrifuged, then unloaded through the bottom interlocking doors.
- Easy access, tool-free unlatching, latching, opening and closing of bottom doors.
- All Stainless Steel construction, fully welded, finished and blended to hygienic standards for direct food contact.
- Integrated central lift bar and flanged upper ring for both manual and automated basket handling capabilities.
- Maximum access for regular sanitation and inspection.
- Provides ideal temporary storage capacity and mobility for extra work-in-process flexibility during the production shift.
- Works with all Heinzen SD300 Series Centrifuges.

BASKET CARTS

- Provides simple, stable, robust, low profile basket handling for Heinzen SD300 bottom-dump baskets.
- All Stainless Steel construction with full wash-down components.
- Maximum access for regular sanitation and inspection.
- Two different styles available
Inboard and Outboard Wheels
