

# NEW 2025 CYCLONE BASKET

*The New Cyclone has been developed in partnership with Intercrate for Heinen's SD50LT Spin Dryer with molded-in holes, strength, ergonomic improvements and features metal detectable FDA material.*

## FEATURES

- **Tough:** Built using high impact food safe resin. Extra thick section on the top rim, bottom radius and handles
- **Ergonomic:** New 4 handle holds for easier grasp optimized for flipping and initial lift up. Extreme drainage on the floor means immediate weight reduction. Grab points on underside for easy lift. Smooth exterior and shoulder-friendly bottom edge are popular with your crews.
- **Rapid drainage:** More open area with new format holes. 1/8 wide slots for ultimate quick drain. Same open area as old version but more "coastline" means the water drains quicker and earlier. The new drain hole format is the equivalent of 15,000 1/8inch holes. Improved draining any leafy product but especially smaller format product that will fall through holes bigger than 1/8 inch. Patented interior fluted surface reduces leaves adhering to surface reducing drain hole blockage
- **Traceable:** Proven metal detection technology makes plastic debris detectable.
- **Color:** Current metal detecting options are white, blue, yellow, green, and red.
- **Sanitation:** The Cyclone can be steam cleaned or cleaned with hot water (unlike polyethylene).

## PRODUCTS

- |              |                  |
|--------------|------------------|
| • Lettuce    | • Celery         |
| • Broccoli   | • Peppers        |
| • Spring Mix | • Onions         |
| • Spinach    | • Diced Products |

## SPECIFICATIONS

- 13 layers stacked empty—4 stacks/pallet
- 52/pallet—93" high on pallet
- Nesting increment: 5"
- Pure white available for non-metal detecting only
- Tare weight: 7lbs.
- Internal volume: 32gal.
