

+++ For immediate release +++

Duesseldorf, GERMANY. At the **IDTechEx Show! Berlin from 11-12 April, 2018** Coatema proudly presents the **new Test Solution generation S2S and R2R**.

The new Test Solution S2S combines stunningly precise coating technology in a handy format and easy-to-use design. Main technical features comprise full operation of the device with pressurized air, a vacuum granite table substrate holder with 5 µm surface precision mounted on a stainless steel or granite frame and exchangeable coating units such as doctor blade and slot die.

The Test Solution R2R 2nd Generation with its continuous R2R **coating & laminating in one unit** is perfect for small trial runs.

Both devices are available now from Coatema and can be tested at Coatema's proprietary Technology Centre in Dormagen, Germany.

We will exhibit at **booth no. K18 Estrel Convention Center, Berlin**.

Since 40 years Coatema is well known as the leading manufacturer of innovative machines in coating, printing and laminating technology. From in-house lab solutions to production plants Coatema provides the full range of advanced customer solutions. For more information, visit www.coatema.de
