## **ULVAC Technologies, Inc. to Exhibit Innovative Device Manufacturing Equipment at the IDTechEx Show!**

Methuen, Massachusetts - ULVAC Technologies, Inc. ([www.ulvac.com](http://www.ulvac.com)) will exhibit unique device manufacturing technologies at the ID TechEx Show, at the Santa Clara, California Convention Center, November 14<sup>th</sup>-15<sup>th</sup>. ULVAC Technologies will be exhibiting its line of device manufacturing equipment for this multi-technology track show. ULVAC makes equipment used for sputtering, etching and photoresist removal applications that are ideal for manufacturing: Electric Vehicle power devices, in both SiC and GaN form factors; Energy harvesting MEMS devices in silicon or piezoelectric (PZT, AlN) materials; Energy storage devices, such as thin film Li-oxynitride batteries; Sensors and actuators used in IoT applications and wearable devices. Come and meet with us at **Booth #R39**. Let's discuss how our equipment can enable your applications, and also find out about our Applications Lab and MEMS Foundry services in Methuen, Massachusetts.

### **About ULVAC Technologies, Inc.**

ULVAC Technologies, Inc. is a leading supplier of production systems, instrumentation, vacuum pumps and components for the semiconductor, MEMS, solar, flat panel display, research automotive, medical, electrical, and refrigeration industries. ULVAC Technologies uses a class-10 process development laboratory and customer demonstration facility to meet the unique needs of their different markets. ULVAC Technologies is a subsidiary of ULVAC, Inc., which is made up of 39 companies engaged in most sectors of the vacuum industry.
