

IVS Full-Class Implementations

This document exists to help our partners prepare and get ready for enrolling multiple students in the same course including increasing your understanding of the IVS full-class implementation solution.

Why do some schools utilize the full-class implementation model?

The majority of our partners enroll large amounts of students in a particular IVS course due to an unexpected loss of a teacher or because of the current teacher shortage crisis. Other partners choose to enroll multiple students because

- IVS offers a course which the local school does not have available
- it affords the local school with a cost-savings benefit without having to staff a full-time teacher
- of a high demand toward a particular summer course which allows students to free up scheduling space during the academic year

To learn more or begin your full-class implementation planning, please visit www.ilvirtual.org or email Ms. Danielle Lewis at dlewis@ilvirtual.org.

Fast Facts About the Full-Class Implementation Model

- IVS will enroll all of the students in the same course section with one assigned IVS teacher. As a result, we may ensure all of the students enrolled from one school will have access to the same teacher improving the level of communication and support offered.
- IVS also has a full-time administrator who is responsible for working with the school to establish the full-class implementation including offering complimentary training for your students, local mentor, and ongoing support as needed.
- Because we recognize your school may have an alternate Fall or Spring semester start date, we may be flexible and work with you to begin and end the course aligned more closely to your academic calendar.
- Most schools choose to schedule ALL their students in the same class period and location such as a computer lab or study hall.
- IVS will enroll all the students on your behalf.
- If the school prefers, IVS may send periodic reports of individual and group progress.
- IVS is also available to share more information about the full-class implementation with your board or parents.
- The cost per semester course is \$240. Schools may choose whether to pay the cost directly to IVS or pass the tuition onto the student.
- Over 90% of our teachers have a Master's Degree including the Illinois certification.
- We support and accommodate the needs of students who have an IEP or 504 plan.
- Students only need reliable Internet access. We encourage schools to provide students with a headset, particularly for our world language courses.
