

## Animal Research Example

Team Names: Dot McDash, Dashy Dotterson, Dashma Dotli	
Animal: Elephant	
Behaviour	What Dash Can Do
Elephants greet each other by tossing their head side to side and make a greeting rumble.	When Dash hears a voice, turn head left and right and make a trumpety grumbling sound.
When elephants drink they suck water up with their trunk and shoot it into their mouths.	When Dash top button, look down and make a slurping sound then look up and make a “whoosh” sound.
When elephants feel threatened, they raise their trunks and make a loud trumpeting sound and charge towards what is threatening them.	When Dash hears a clap, look up, making a loud trumpet sound, and charge forward.
When an elephant wants the group to travel in a different direction they turn in that direction and repeatedly make a rumbling “pop pop pop” sound.	When Dash right button, Repeat three times: look right, turn right and make a rumbling “pop pop pop”, then look center turn left to original position.

```

    When Dash Hear Voice
    Repeat 4 times
      Look left 90
      Look right 90
    My sounds #1

    When Dash Top Button
    Forward 20 fast
    Look down 7
    My sounds #2
    Look up 22
    My sounds #3

    When Dash Hear Clap
    Look up 22
    My sounds #4
    Forward 50 really fast

    When Dash Button 1
    Repeat 3 times
      Look right 90
      Turn Right 90
      My sounds #5
      Look forward 0
      Turn Left 90
  
```
