

Do You or Your Significant Other Have Chronic Posttraumatic Stress Disorder (PTSD)?

We are seeking men and women, at least 18 years old, diagnosed with chronic PTSD and a person who they have a significant relationship with. This does not have to be a romantic relationship. You both must be in good physical health, with blood pressure that is normal.

We're conducting a research study of an investigational drug used in combination with conjoint psychotherapy. The study takes place in Charleston, South Carolina. For participants from out of town, reimbursement for travel may be provided.

For more information, please call (843) 882-5203 or see maps.org/research/mdma.
