

COLOR THAT SHAPE

Sally has set a shape challenge.

You must shade each shape either red, yellow or blue using the following rules:

- 1) No triangles are red.
- 2) One of the squares is blue.
- 3) Each pair of similar shapes must be shaded different colors, so you cannot have 2 yellow triangles or 2 blue squares.
- 4) There is one red shape in the middle column, and no red shapes in the left column.
- 5) There are no blue shapes next to each other.

Can you make up your own shape challenge with these shapes?

COLOR THAT SHAPE ANSWERS

Sally has set a shape challenge.

You must shade each shape either red, yellow or blue using the following rules:

- 1) No triangles are red.
- 2) One of the squares is blue.
- 3) Each pair of similar shapes must be shaded different colors. E.g. You cannot have 2 yellow triangles or 2 blue squares.
- 4) There is one red shape in the middle column, and no red shapes in the left column.
- 5) There are no blue shapes next to each other.
