## DILLY'S EGGS 2

Dilly the Diplodocus has laid some eggs.
She has laid between 10 and 20 eggs.
She counts the eggs by putting them into piles of 4 . She finds that she has 3 left over.

She then counts the eggs by putting them into piles of 3 and finds that she has one left over.

How many eggs has she got?

What if Dilly had between 30 and 40 eggs?
