PROBLEM SOLVING - AT THE SEASIDE 1 ANSWERS

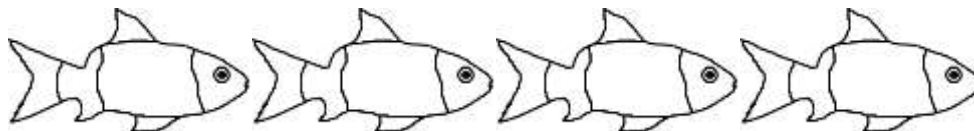

1) Captain Salamander builds 8 sandcastles. The sea comes and washes away 5 of them. How many are left? $8 - 5 = 3$ sandcastles

2) Flame spots 3 starfish in a rock pool. She counts their legs. How many legs are there altogether? $5 + 5 + 5 = 15$ legs

3) Tyger sees a herd of 10 seahorses. He scares 3 of them away. How many are left? $10 - 3 = 7$ seahorses

4) Captain sees 4 fish. 8 more fish come along. How many are there now? $4 + 8 = 12$ fish
