

PROBLEM SOLVING SALAMANDER FISHING ANSWERS

1) Captain Salamander catches 10 more fish than Flame in the first hour. Flame catches 15 fish.	How many fish does the Captain catch? $15 + 10 = 25$ fish												
2) Frazer catches 12 fish in the first hour and 6 fish in the second hour.	How many fish does he catch in total? $12 + 6 = 18$ fish												
3) Tyger manages to catch 20 fish in the first two hours. He caught 12 fish in the first hour.	How many fish did he catch in the second hour? $20 - 12 = 8$ fish												
4) By lunchtime, Frazer has caught 18 fish. By accident, Tyger knocks his bucket over and 9 of the fish are tipped back into the lake.	How many fish does Frazer have now? $18 - 9 = 9$ fish												
5) Tyger has 20 fish. He gives 10 of his fish to Tyger for knocking over the bucket.	How many fish does Tyger have now? $20 - 10 = 10$ fish												
<p>6) At the end of the fishing trip, the number of fish caught are: Tyger: 45 fish Captain: 92 fish Frazer: 23 fish Flame: 86 fish <i>Put these results in order, from highest to lowest.</i></p> <table style="width: 100%; text-align: center;"> <tbody> <tr> <td style="color: red;">Captain</td> <td style="color: red;">Flame</td> <td style="color: red;">Tyger</td> <td style="color: red;">Frazer</td> </tr> <tr> <td style="color: red;">92 fish</td> <td style="color: red;">86 fish</td> <td style="color: red;">45 fish</td> <td style="color: red;">23 fish</td> </tr> <tr> <td>highest</td> <td></td> <td></td> <td>lowest</td> </tr> </tbody> </table>		Captain	Flame	Tyger	Frazer	92 fish	86 fish	45 fish	23 fish	highest			lowest
